- How do we account for investments that are not subsidiaries?

Recap: Parent company theory versus entity theory

Accounting for Joint Arrangements (IFRS 11) and for Associates (IAS 28)

Joint Operations - Examples

16. INTEREST IN JOINT OPERATION

On 13 December 2016, Gold Fields purchased 50% of the Gruyere Gold Project and entered into a 50:50 unincorporated joint operation with Gold Road Resources Limited (“Gold Road”) for the development and operation of the Gruyere Gold Project in Western Australia, which comprises the Gruyere gold deposit as well as additional resources including Central Bore and Attila/Alaric.

The Gruyere project was successfully completed during 2019, with first gold produced in June 2019. Commercial levels of production were achieved at the end of September 2019.

2.3 Joint operations

Joint operations are consolidated in accordance with IFRS 11, based on the interest held.

Aerologic GmbH (Aerologic), Germany, a cargo airline domiciled in Leipzig, is the only joint operation in this regard. Aerologic has been assigned to the Express segment. It was jointly established by Lufthansa Cargo AG and Deutsche Post Beteiligungen Holding GmbH, which each hold 50% of its capital and voting rights. Aerologic’s shareholders are simultaneously its customers, giving them access to its freight aircraft capacity. Aerologic mainly serves the DHL Express network from Monday to Friday, and flies for the Lufthansa Cargo network at weekends. Individual aircraft are also used exclusively by the two respective shareholders. In contrast to its capital and voting rights, the company’s assets and liabilities, as well as its income and expenses, are allocated based on this user relationship.

Joint Ventures and Associates: significant influence

- IAS 28.2: Significant influence is the **power to participate in the financial and operating policy decisions** of the investee but is not control or joint control over those policies.
- IAS 28.6 ff.: If an investor holds, directly or indirectly (e.g. through subsidiaries), **20%** or more of the voting power of the investee, it is presumed that the investor has significant influence

Joint Ventures and Associates: applying the equity method

- Basic idea:

| Initial Measurement | Subsequent Measurement |
|--|--|
| <ul style="list-style-type: none">▪ Cost of the investment | <ul style="list-style-type: none">▪ Adjust for post-acquisition changes in investor's share in investee's net assets▪ Considering depreciation of hidden reserves |

- No consolidation: individual assets/liabilities of investee are not brought onto the consolidated balance sheet!
- Economic activities are presented in only one line in balance sheet ("Investments accounted for under the equity method") and in the statement of profit/loss ("Income from investments accounted for under the equity method")
- Additional disclosures required in the notes

Exercise: Joint Ventures and Associates: equity method

Fact Pattern:

M AG has purchased for 1,100 CU 40% of the shares of L GmbH as of 01.01.20X1.

Questions:

- a) Please apply the equity method to value the investment in M AG's consolidated financial statements in 20X1 using the following information:
- L GmbH as of 31.12.20X0
 - Share capital and reserves: 2,000 CU
 - Hidden reserves (remaining useful life: 10 years): 500 CU
 - L GmbH as of 31.12.20X1
 - Distribution of 20X0's profit (100 CU)
 - New profit generated in 20X1: 200 CU
- b) Please give the appropriate journal entries for 20X1.

Exercise: Joint Ventures and Associates: equity method

Exercise: Joint Ventures and Associates: equity method

Exercise: Joint Ventures and Associates: equity method

a) Please apply the equity method...

Initial measurement and purchase price allocation:

| | | |
|-----------------------|--|----------|
| Investment book value | | 1,100 CU |
| thereof | Hidden reserves $0.4 \cdot 500 =$ | 200 CU |
| | Book value of equity $0.4 \cdot 2,000 =$ | 800 CU |
| | Goodwill $1,100 - 0.4 \cdot 2,000 - 0.4 \cdot 500 =$ | 100 CU |

Subsequent valuation:

| | |
|---|----------|
| Investment book value as of 01.01.20X1 | 1,100 CU |
| + proportionate profit 20X1 ($=0.4 \cdot 200$) | +80 CU |
| - proportionate distribution ($=0.4 \cdot 100$) | -40 CU |
| - depreciation of hidden reserves ($=200/10$) | -20 CU |
| Investment book value as of 31.12.20X1 | 1,120 CU |
| (Hidden reserves = | 180 CU) |
| (Goodwill = | 100 CU) |

Exercise: Joint Ventures and Associates: equity method

b) Please give the appropriate journal entries for 20X1.

Course Structure

| Block | Topic |
|-------|---|
| 5 | Joint Arrangement and Investments at Equity Changes in Control |
| 5.1 | Joint Arrangement and Investments at Equity |
| 5.2 | Changes in Control |

- How do we capture changes in a parent company's equity share after initial consolidation?

Step Acquisitions – Accounting Implications

Step Acquisitions - Overview

- Step acquisition
 - Acquisition in which the change of control occurs in several steps.
 - First time consolidation at the time of the change in control.
 - IFRS 3.41:

An acquirer sometimes obtains control of an acquiree in which it held an equity interest immediately before the acquisition date. For example, on 31 December 20X1, Entity A holds a 35 per cent non-controlling equity interest in Entity B. On that date, Entity A purchases an additional 40 per cent interest in Entity B, which gives it control of Entity B. This IFRS refers to such a transaction as a business combination achieved in stages, sometimes also referred to as a step acquisition.
- Problem
 - Difference between the value of shares consolidated at cost or at equity to the fair value at the time of the change of control.
- Solution
 - IFRS: Recognition as profit or loss

Step Acquisition - Example

- Scenario:

Parent (Entity A):

| | | |
|----------------|-----------------|-------------|
| t ₁ | 1. tranche: 35% | Costs: 500 |
| t ₂ | 2. tranche: 40% | Costs: 1000 |

Subsidiary (Entity B):

| | | |
|----------------|---------------------|-------|
| t ₁ | Equity (Fair Value) | 1,500 |
| t ₂ | Equity (Fair Value) | 2,000 |

Step Acquisition - Example

In t_2 change of control \rightarrow revaluation of equity:

Fair Value of Equity in t_2 2,000

| 35% (1.tranche) | 40% (2. tranche) | 25% Non-controlling interest |
|-------------------------|--------------------|------------------------------|
| 35% of 2,000 = 700 | 40% of 2,000 = 800 | 25% of 2,000 = 500 |
| Costs = 500 | Cost = 1,000 | |
| Increase in value = 200 | Difference= 200 | |
| IFRS 3: profit 200 | Goodwill: 200 | |

Step Acquisition – Journal Entries

Journal entries t_1

|-------------------------------|--|-----|----------------|-----|

Notes:

- (1) Purchase of 1st stake in Entity B for 500
- (2) Revalue 1st stake to FV under IAS 39
- (3) Purchase of 2nd stake in Entity B for 1,000; consolidation
- (4) “Recycling”

Disposal of Subsidiaries – Loss of Control

IFRS 3.B98: If a parent loses control of a subsidiary, it shall:

a) derecognise:

- (i) the assets (including any goodwill) and liabilities of the subsidiary at their carrying amounts at the date when control is lost; and
- (ii) the carrying amount of any non-controlling interest in the former subsidiary at the date when control is lost (including any components of other comprehensive income attributable to them).

b) recognise:

- (i) the fair value of the consideration received, if any, from the transaction, event or circumstances that resulted in the loss of control;
- (ii) if the transaction, event or circumstances that resulted in the loss of control involves a distribution of shares of the subsidiary to owners in their capacity as owners, that distribution; and
- (iii) any investment retained in the former subsidiary at its fair value at the date when control is lost.

c) reclassify to profit or loss, or transfer directly to retained earnings if required by other IFRSs, the amounts recognised in other comprehensive income in relation to the subsidiary on the basis described in paragraph B99.

d) recognise any resulting difference as a gain or loss in profit or loss attributable to the parent.

Disposal of Subsidiaries – Discontinued Operations

- IFRS 5.32: A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and
 - represents a separate major line of business or geographical area of operations,
 - is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations or
 - is a subsidiary acquired exclusively with a view to resale.
- IFRS 5 prescribes that a business held for sale is ...
 - carried at the lower of its carrying amount and fair value less costs to sell, and
 - presented separately on the balance sheet.

Loss of Control – Exercise

Fact Pattern:

- X AG purchases 75% of Y GmbH's shares at a price of 900 at Dec 31, 20X1.
- Therefore, Y GmbH's fair value (100%) is assumed to equal 1,200.
- Book value of equity equals 500 with hidden reserves of 300.
- Hidden reserves (300) of Y GmbH are depreciated over three years.
- Goodwill (non-controlling interest at revalued equity: 300) and full goodwill (full goodwill method: 400) are not impaired.
- Y GmbH made a profit of 50 in 20X2.

After performing the subsequent consolidation at Dec 31, 20X2 and measuring the non-controlling interest at their proportionate share of revalued equity, X AG sells its shares in Y GmbH's capital at 1,200.

Question:

Please account for the loss of control!

Disposal of Subsidiaries

IFRS 10.25: If a parent loses control of a subsidiary, the parent:

- a) derecognises the assets and liabilities of the former subsidiary from the consolidated statement of financial positions
- b) recognises any investment retained in the former subsidiary at its fair value when control is lost and subsequently accounts for it and for any amounts owed by or to the former subsidiary in accordance with relevant IFRSs. That fair value shall be regarded as the fair value on initial recognition of a financial asset in accordance with IFRS 9 or, when appropriate, the cost on initial recognition of an investment in an associate or joint venture.
- c) recognises the gain or loss associated with the loss of control attributable to the former controlling interest.

Block 5: Key take-aways

- The intensity of the relation between a parent company and different other entities in the corporate group varies. These differences are captured in the accounting treatment.
 - Subsidiary: full consolidation
 - Joint arrangement, joint ventures, associates: equity method
- The equity method is a “one-line consolidation” approach. It does not allow users to see through to the underlying fundamentals of the investee.
- Changes in control can arise because of changes in the parent company’s ownership shares. Necessary one-time adjustments are accounted for in profit/loss.
