

How to upload a video on Mediasite

Go to <https://video.uni-frankfurt.de/Mediasite>

Login with **your existing university account.**

- When Mediasite is down, it sometimes claims the login is invalid. If that happens, wait a few hours, try again.
- If Mediasite is down, there's usually info available here: <https://twitter.com/hrzmt>

FD2.2

Welcome to Assessment in the EFL (Gastron)

48 2m 29s

Upload video

- It must be a video, it cannot just be a PowerPoint
- If you created a PowerPoint with audio recordings, just export it to video first

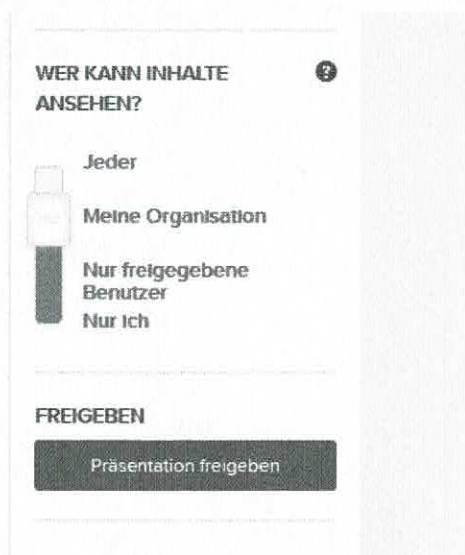

The upload is fast, but video processing can take some time. Sometimes, minutes. Sometimes, hours. You get an email once the processing is done.

If you haven't gotten an email within a few hours (!), try uploading again.

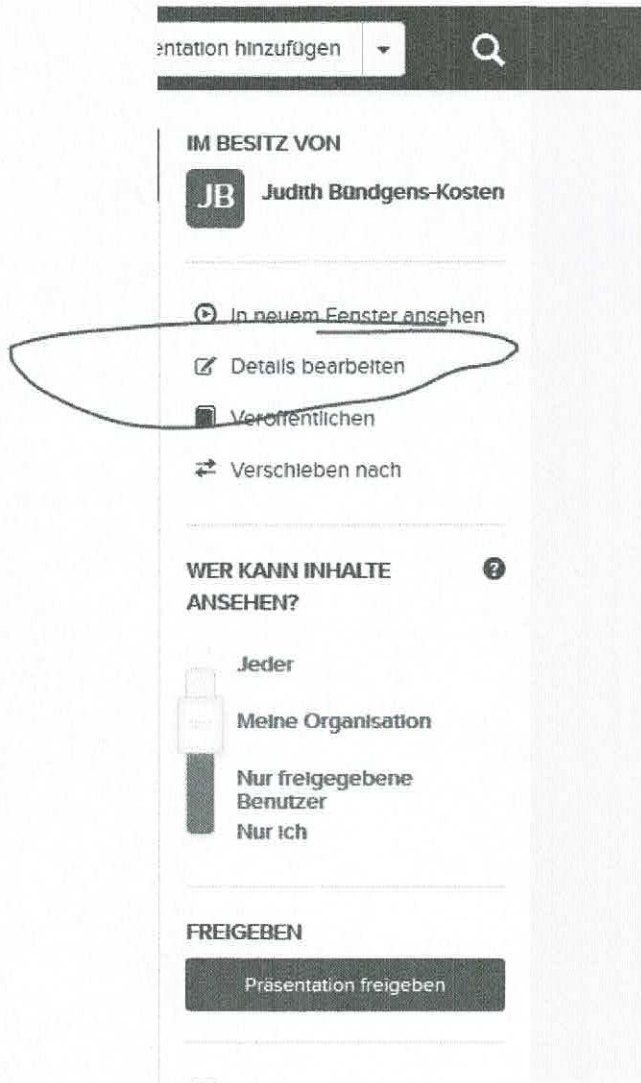

Once the video has finished processing, go back to Mediasite.

You have two options now:

- A) You can make the video visible to all members of the university. If you post the link on OLAT, everybody can click on the link, log onto Mediasite, and view the video.

B) Integrate it into our OLAT course using the OLAT video plugin

Click on „Details bearbeiten“, then scroll to the bottom of the page.

Click on „Hinzufügen zu Modul and choose **the right module**.
