

Bad Homburg, DEU • Intern (Fixed Term) • Vollzeit

Intern (m/f/d) Biomedical Evidence Generation – Person-Centered Outcomes Research

You are interested in the development of person-centered approaches in the context of medical devices and kidney care as well as conceptualizing and running clinical studies? Then join our Biomedical Evidence Generation – Person-Centered Outcomes Research team at Fresenius Medical Care. In this way, you will get a taste of cutting-edge research with a meaningful, person-centered approach.

Your tasks

- You will support our team in the analysis of survey data and patient-reported outcomes
- Furthermore, you will help to write reports and manuscripts using clinical study data
- You will administer and file study documentation and standard operating procedures

Your profile

- Current master's studies in psychology, statistics, administration, natural or social sciences
- Strong communication skills in English and preferably also in German
- Knowledge of SPSS, R or similar statistics software an advantage
- Structured, independent working style

Our offer to you

As an intern, there is a lot for you to discover at Fresenius. Add purpose to your career:

- Comprehensive support; participation in exciting departmental tasks, processes and projects; opportunities to contribute and implement your own ideas
- Professional and personal development opportunities gained through engaging in hands-on work while still a student
- Opportunities to network with colleagues and young professionals from other divisions via our intern community
- The chance to lay the foundation for a potential employed position at Fresenius – as seen in the careers of many former interns and working students

Following the internship, a final thesis may also be possible by arrangement. The preceding internship is mandatory for this.

Start: as of now

Duration: 6 months

Location: Bad Homburg (Mobile working possible by arrangement; regular presence on site required)
